Technician installing a water softener Lubbock TX home

PROMPT

```
A wide shot of a technician seen from behind, kneeling beside a generic, unbranded residential water softener: a tall slim navy-blue resin tank beside a squat gray brine tank with a closed lid, a digital control head on top, copper and white PEX pipe connections, which is freshly installed against the wall of a tidy Texas home garage with a painted concrete slab floor, white walls and a storage shelf. A water heater and copper supply lines are visible behind. The garage door is open to bright West Texas daylight. Compose the subject in the right half of the frame and keep the left third calm and uncluttered, with softer light, because headline text sits over it. Photorealistic editorial photo, natural daylight, clean composition, muted navy-blue and warm copper accents, crisp detail. No text, letters, numbers or logos anywhere; screens, dials, gauges and paper stay blank. No visible faces; people appear only from behind or as hands. Generic, unbranded equipment. Aspect ratio 16:9.
```
